

INGENIOUS LIGHTING

powered by
thermologi

a new lighting product

that will redefine how consumers use

Outdoor Living Spaces

What makes Joi so incredible is that it doesn't use batteries, solar, or wall power to create its light.

Caframo® is known for their unique wood stove Ecofans. Joi uses the same thermoelectric technology to transform the energy of a tea light candle into enough light to illuminate an outdoor living space.

Within minutes Joi begins to convert the heat of the candle

into more than 18 times the light generated by the tea light alone.

Constructed of stainless steel, glass and aluminum, Joi is built to withstand the outdoors.

Designed to be a contemporary centerpiece with style that appeals to all. Joi gives consumers a magical and useful light source for outdoor entertaining.

PRODUCT DIMENSIONS

7" W x 7" L x 8" H
(Lamp head extends to a vertical height of 16")

BOX DIMENSIONS

9 1/4" W x 9 1/4" D x 11 1/4" H

SINGLE BOX WEIGHT

Approximately 5 lbs
